

LENTO

Oil-free compressed air of outstanding quality

Our LENTO series generates 100% oil-free compressed air for all applications, where products of the highest quality are produced. Given that only water, the most natural of all raw materials, is used in the compression process, LENTO delivers maximum compressed air quality for highly senstive areas e. g. the pharmaceutical, foodstuffs, electrical engineering and medical industries.

The speed-controlled direct drive of the LENTO series delivers maximum cost-effectiveness by precisely matching the volume flow to the respective compressed air requirement. The integrated refrigeration dryer ensures a low pressure dew point. Therefore, under certain circumstances, the customer doesn't need a separate refrigeration dryer. This avoids costs for the fresh water supply and water processing and minimises service and maintenance costs compared with other oil-free compression systems.

Clean and ecological solution:

- Clean, environmentally friendly oil-free compressed air
- ISO class 0, certified in accordance with ISO 8573-
- Dust particles that are drawn in are washed out by the
- Clean condensate pure water can be discharged directly into the sewer system
- Very low temperatures during compression thanks to excellent heat transfer via the water. Reduced amounts of energy are therefore used to generate the compressed air

100% oil-free compressed air for industrial use (pharmaceutical, food, chemical, etc.)

LENTO I: 15 - 30 kW LENTO II: 30 - 55 kW LENTO III: 45 - 80 kW LENTO IV: 80 - 130 kW

Volume flow acc. to ISO 1217 (Annex C-1996)

1.01 - 18.03 m³/min

Operating pressure

LENTO I & II: 5 – 10 bar LENTO III & IV: 5 - 13 bar

Water-cooled: (standard) Air-cooled: (option) Only water-cooled available as of LENTO 80

Direct and speed-controlled

Energy efficiency class IE 3; IP 55 protection, protection class F

Flade in Germany

ALMIG

ALMIG

- + Volume flow can be adapted exactly to meet
- + Energy-saving soft start without current

SCD direct drive Zero-loss power transfer

Compressor

Single-stage, water-injected; very low compression temperatures of <60°C, close to isothermic, economical compression

SCD motor

Highly efficient drive motor, IP 55 protection class ISO F; compact, powerful, reliable

Air Control

0

Smart controller that monitors, visualises and documents

Suitable controllers

AIR CONTROL P

oil-free

Standard

AIR CONTROL HE

Optional

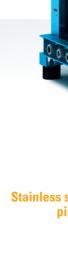

Stainless steel piping

Integrated refrigeration dryer

Permanent generation and exchange of the required coolant, optimum biological and chemical water quality, for dry compressed air at the compressed air outlet

SCD frequency converter

The integrated power pack, according to EMC guidelines
